

ROTOBEC

**SCRAP
SOLUTIONS**

**CHANGING
THE GAME.**

ROTOBEC REVOLUTIONIZED THE SCRAP MARKET

through decades of innovation and knowledge within the industry. Our innovative designs are built for toughness and durability, which is how we have changed the game.

It's about giving it our all and raising the bar. Every component of our products are designed and manufactured in our production facilities in Sainte-Justine, Quebec and in New Hampshire, USA. The most advanced technologies are used throughout the process and the result is simply the best material equipment available out there.

Unbeatable quality and nothing less. This is the promise Rotobec has been delivering throughout the years wherever you are in the world. We have worked hard for you. This is why today Rotobec products are globally recognized and trusted, making us a world leader in the industry.

We are Rotobec.

**THE
SMALLEST
DETAILS
MATTER
MOST.**

QUALITY IS OUR TOP PRIORITY.

We are innovators. All of our grapples are made with only the highest quality steel and components, to provide you with the best and most durable products out there. Combined with our exceptional workmanship, we ensure the longevity of your attachment.

We have put our heart and soul in every detail to bring you the best and highest performing scrap attachments in the industry.

**Level up your
productivity with
increased versatility
and less downtime.**

THE KING OF ROTATORS

WE'RE CALLED ***ROTO-BEC*** FOR A REASON

Rotobec has been pushing the boundaries of innovation in the world of rotator design. We are well-known for our innovation and developments with the most advanced continuous 360° rotators. Our rotators are without a doubt the longest lasting ever made. They offer cost effective maintenance due to easily accessible greasing points and motor, allowing them to go further and protect your investment. All of our rotators are fully sealed, allowing them to be fully submersed in up to 15 feet (3 meters) of water with the standard 360° rotation and a fully supported pinion gear. We are committed to delivering the most reliable rotators on the market, no matter where you are in the world. Why settle for anything but the best?

ROTORBE

THE ONE AND ONLY CDS TECHNOLOGY

A CYLINDER FOR THE AGES. SELF CONTAINED HYDRAULICS.

Scrap handling is the toughest task a grapple can take on. The threat of damaged cylinders and hoses shutting down your operations is a problem faced daily by scrap material handlers. In order to protect your most precious asset, we have designed a cylinder that has revolutionized the industry. Our cylinder contains an internal hydraulic channel that eliminates the need for a return hose. This self-contained system provides you with a cylinder that is better protected and more durable than any other option on the market. Want less downtime and less damaged cylinders? Try our CDS technology for yourself. You will not look back.

KEEP A CLEAN MACHINE

360° OF PROTECTION INTEGRATED CYLINDER GUARD

Rotobec has the best guarded cylinder on the market which protects it from machine contamination. This innovative self-contained cylinder design has allowed us to incorporate a cylinder guard that provides protection from all 360° with integrated mechanical stop. With no need for an opening at the back of the guard for the return hose to pass through, Rotobec Orange Peel Grapples provide an unmatched level of protection. Reduce your downtime and step into the future of scrap handling.

The Rotobec Orange Peel Grapple

is recognized as the industry leader in both innovation and toughness. Their sleek, yet robust, design and standard 360° rotation make them a dream to own and operate. Available in 4-Tine, 5-Tine, and Mag-Grab configurations, Rotobec Orange Peel Grapples push the boundary of possibilities to a whole new level. Equipped with Rotobec's own high pressure cylinders, and one of the industry's only self-contained hydraulic fluid channeling system, these beasts are quickly revolutionizing the world of scrap handling. Increase your up-time, reduce your maintenance costs and dominate your competition.

Mag Grabs

With the same unparalleled performance and quality found in Rotobec Orange Peel Grapples, the Rotobec Mag-Grapple series will help you elevate your operations. Available in 4-tine configurations with magnet sizes ranging from 30" - 50" (762 mm - 1270 mm), we have the solution you deserve.

A large, detailed view of an orange peel grapple attachment on a green excavator arm. The grapple has two large, curved tines and is positioned over a pile of dark material. The background is a cloudy sky.

ORANGE PEEL GRAPPLES

FOUR TINE

A four-tine grapple attachment, featuring four curved tines and a central mounting point. It is shown against a cloudy sky background.

FIVE TINE

A five-tine grapple attachment, featuring five curved tines and a central mounting point. It is shown against a cloudy sky background.

MAG GRAB

A Mag Grab grapple attachment, featuring a yellow circular base and several curved tines. It is shown against a cloudy sky background.

Rotobec Poly Grabs are specially designed to handle scrap, waste and various materials, with excellent penetration and exceptional material gripping capabilities. These scrap attachments come standard with our built in-house RT rotator, with a robust pinion and crown gear design and rated at 6.3 ton lifting capacity. We offer both 4-tine and 5-tine configurations to ensure the best match for all your material handling needs, all equipped with our wear resistant tips to maximize your grapple's life. Equipped with Rotobec's own 4300 PSI (300 bar) hydraulic cylinders, and manufactured using high-tensile steel, our Poly Grab Grapple is quite simply the toughest around.

Medium Duty: Designed and manufactured with the same passion and attention to detail. This economical solution to scrap handling features the robust design Rotobec is known for, while incorporating speed and agility. Available in both 4 and 5 tine configurations, Rotobec Medium Duty Orange Peel Grapples help to bridge the size gap but maintain only the highest quality and durability. Don't just handle scrap, dominate it.

POWER ATTACHMENTS

The Rotobec Power Attachments (RPA) are up for anything. Each configuration is available with either a dangling rotator or one of Rotobec's incredible RGP positioned rotators. The *Demolition version* is by far the toughest member of the RPA family. Fabricated from thicker steel and featuring beefed-up guarding, this grapple is built to take a beating. The diversity of the RPA is simply unmatched by any other type of grapple available.

BUILT TO OUTLAST.

ROTOBEC **DYNAMIC** **WARRANTY PACKAGE**

Rotobec Orange Peel Grapples transformed the industry. And now, our new industry leading Dynamic Warranty Package offers unprecedented warranty coverage and unbeatable support.

Rotobec provides you the peace of mind you deserve so you can surpass the competition.

ROTOBEC

ROTOBEC

■ At Rotobec, we are not (and will never be) afraid to say it out loud: **we are the best!**

The reason is simple. Just like you, we have earned this position. And just like you, we work hard every single day to keep it. From dawn to dusk. Just like you, we know that the best things in life are tough earned.

That's why we never take anything for granted; a reputation, the number of fans on Facebook, a safe place in the industry, the trust of the dealers, the satisfaction of the customers, the comfort of the team, the perfection of a piece of equipment. It's about giving it our all and raising the bar. Doing better, pushing harder, going further.

That is how we achieve to build the most trustworthy equipment and relationships in the business. Why accept less? **You deserve what's best.** The industry deserves what's best. The world deserves what's best.

So together, let's aim higher. If it doesn't exist, we'll create it. We can do better, let's do it. When the horizon gets tough, we keep going.

We are Rotobec!
